Section 1 – Introduction

This annual report was prepared in reference to the Ventron/Velsicol Superfund Site Operable Unit One (OU-1) Project located in the Boroughs of Wood-Ridge and Carlstadt, New Jersey. The project was operated under United States Environmental Protection Agency (USEPA) ID NJD980529879. This report was prepared in accordance with the reporting requirements of 40 CFR 262.56 and details material classified as hazardous waste as defined by 40 CFR 261. The wastes were generated as part of the implementation of the US EPA Region 2 and NJDEP approved remediation between January 1, 2010 and December 31, 2010 and subsequently exported from the United States. The generator of waste detailed in this report was Morton International, Inc. This report has been prepared for Rohm and Haas Chemicals, LLC, an authorized signatory of Morton International, Inc.

The physical address for the OU-1 Project is:

5 Ethel Boulevard
Wood-Ridge, New Jersey 07075

The mailing address for the OU-1 Project is:

Rohm and Haas Chemicals, LLC. Attn: Robert Casselberry
Care Of Dow Engineering Solutions
3100 State Road
Croydon, Pennsylvania 19021

This report is organized as follows:

Section 1 – Introduction;
Section 2 – Waste Exported which details the waste exported and consignee it was exported to;
Section 3 – Waste Reduction which details efforts taken to reduce the volume or toxicity of waste generated; and
Section 4 – Certification required by 40 CFR 262.56.

Section 2 – Waste Exported

A total of 5164.68 tons of material classified as hazardous waste in the United States was exported from the OU-1 Project. The amount of material shipped from the project, as well as the transporters and consignee are detailed below. Waste detailed in this report was exported from the United States under transboundary agreement numbers 526/08 received January 13, 2009 and 589/09 received December 10, 2009.

2.1 Waste Exported

Waste from the OU-1 Project consisted of mercury impacted soils excavated from the upland portion of the site. This material contained Toxicity Characteristic Leaching Potential (TCLP) mercury concentrations greater than or equal to the Resource Conservation and Recovery Act (RCRA) limit of 0.2 mg/l and/or observable elemental mercury. A total of 5164.68 tons of material classified as hazardous waste was excavated from the OU-1 Project and exported, consisting of 216 shipments. Shipments of waste including the weight of each shipment are summarized in **Table 1**.

Waste was transported with the following hazard information:

USEPA waste code: D009

United States Department of Transportation (DOT) hazard class: 9

United Nations (UN) Dangerous Goods Number: 3077

2.2 Transporters

Waste from the OU-1 Project was loaded in intermodal containers before leaving the Project. Intermodal containers were transported by Epic LLC of Newark, New Jersey. Containers were transported by truck approximately 10 miles where they were transferred to railroad cars and transported by CSX Corporation. Control of the railroad cars was later transferred to the Canadian Pacific Railway and the Quebec-Gatineau Railway, the latter of which handled the waste in Canada only. The US EPA ID of each of the transporters is listed below in **Table 2**. Each container was shipped under an EPA uniform hazardous waste manifest and Canadian movement document/manifest. Reference numbers of the United States and Canadian shipping documents for each shipment are included in **Table 1**.

2.3 Consignee

Waste was exported to Stablex Canada, Inc. located at 760 Boulevard Industriel, Blainville, Quebec. Stablex holds Canadian registration number/provincial ID number 1143649946.

Section 3 – Waste Reduction

The material described in this report was generated in the course of remediation. Efforts were made during excavation, material handling and stockpiling to segregate soils with TCLP mercury concentrations greater than the RCRA limit of 0.2 mg/l and/or observable elemental mercury from other soils to avoid increasing the mass of hazardous waste generated through cross contamination.

Section 4 – Certification

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment.

Signed,

Robert L. Casselberry Jr.
Remediation Manager
Rohm and Haas Chemicals LLC
